## SUMMARY

I am a determined problem solver with in-depth knowledge of the software lifecycle and design patterns. I consider understanding the big-picture of a project crucial while staying grounded in my skills and where I can provide the most value. I am skilled in identifying and implementing appropriate technical solutions while maintaining software craftsmanship throughout each project. In addition, I possess excellent communication and critical thinking skills to identify business challenges and immediately prescribe effective technical solutions. Finally, I am a natural creative with a passion for creating visually stunning solutions that thrive.

## PROFESSIONAL EXPERIENCE

### Front End Engineer                                                   Miami, FL
Dental Whale                                                           07/20 - Present

– Collaborated with a team of engineers alongside designers and many others to create a collection of applications specifically for dental practices across the country. With over 19,000 dental practices utilizing the platform ORCA, my team focused on creating tools to reveal inefficiencies within their business and view their patients at a glance. Such applications were created using Angular, RXJS, and React.

– Developed ORCA Shop, a platform used for dental practices to buy and search from thousands of products within the dental industry. Technologies utilized for this project include React, NextJS, SWR, REST, Algolia, and Framer Motion.

– Built various SEO-focused landing pages and paywalls within short timelines. Given the fast-paced environment, I developed a collection of company-wide React components documented using Storybook to improve development turnaround time.

### Lead Developer                                                       El Paso, TX
Spectrum Technologies                                                   09/17 - 07/20

– Developed and maintained over 200+ websites and apps built on the WordPress framework. Custom WordPress themes and plugins were created using HTML, CSS, JavaScript, jQuery, Bootstrap 4, SCSS/LESS, NodeJS, and AngularJS.

– Designed and implemented RESTful APIs using NodeJS.

– Consulted with project stakeholders to identify business automation requirements.

– Provided technical insight regarding opportunities for new products and services.

### Web Developer                                                        El Paso, TX
Stanton Street                                                          02/16 - 09/17

– Collaborated with a team to create custom websites and applications based on the client's goals, budget, and timeline.

– Developed front-end applications with the use of Bootstrap framework and custom CSS.

– Designed and implemented a content management system from the ground up using PHP, JavaScript, AJAX, CSS, and HTML. The core of this CMS is installed on all systems built at the company.

## EDUCATION

### Bachelor of Science in Computer Science - Minor in Mathematics
The University of Texas at El Paso

## SKILLS

| | | | |
|---|---|---|---|
| – Highly motivated | – Typescript | – Angular | – Babel |
